

# pendulum & crystal healing advanced training

## description

This training will be held 1 day a month over 10 months.

It is designed to provide

- an understanding of the main systems of the body, their functions, structure & relationship to the rest of the body
- mental-emotional factors that resonate with each system & if out of balance can trigger a breakdown in the integrity of that system
- common symptoms that are likely to arise when a system is stressed
- protocols to balance each system using the power of intention, pendulums & crystals

## energy medicine

The causal & most sensitive element in the body is the subtle energy field. This energy is the carrier of the codes of human life. It is like the seed of a tree; if the seed is damaged it will give rise to an unhealthy tree as the broadcast of life is unclear. Energy is the body's intelligence; when it becomes disrupted the body starts to behave unintelligently. When the disruption is severe, the flow of energy can reverse & patterns of sabotage can set in. The Pendulum is one powerful tool to correct the disruptions & reversals in the body's energy field.

## human life

Human life is both one & many at the same time; it is a microcosm of a macrocosm. As such it is made up of many aspects.

of our lives we need to address everything that makes us human. Exploring & bringing into balance all the systems of the body is one way we can set about to do this.

## body systems

The body systems we will explore & balance are the

- chakra system
- nervous system
- endocrine system
- immune system
- digestive system
- cardiovascular system
- respiratory system
- eliminatory systems
- muscular & skeletal systems
- cellular system

With a simple understanding of how our systems work & relate to the rest of the body, plus the power of our intention to direct our crystals & pendulum where to go, we can systematically set about to balance all the systems in our body so they support each other in their vital functions. This is energy medicine at its best.
